Company Recruitment Team

November 14, 2017

COMPANY NAME

Job Application for Software Engineer

Dear Hiring Team,

About Me

I am a graduate student at University of Florida(UF). I will be graduating with a Master of Science degree in Computer Science in May 2018. I am looking for a full-time job or as a software development engineer in your company. I firmly believe that my education and previous programming experience qualify me for this position.

Why Me

While pursuing my Master's degree in Computer Science, I learned many useful software development skills and had thorough understanding of data structures and algorithms. I developed some java and android applications. I also designed several simple web pages and completed some big-data-related work. I've attached a copy of my resume that details my projects and experience. I enjoy being challenged and working on projects that require me to work outside my comfort and knowledge set, as continuing to learn new languages and development techniques are of great importance to me and the success of your organization.

Contact Me

As an engineer eager to learn new techniques and make a contribution to an outstanding company, I am excited to submit my application for consideration. If you would like to discuss my qualifications further, please feel free to contact me at (352) 222-1481 or at jmyu1994@ufl.edu. Thank you so much for your time and consideration. I look forward to hearing from you.

Sincerely,

JingminYu
